

Over the next 20 years, the N.C. Department of Commerce estimates the project will:

- Generate a cumulative gross state product value of about \$24.5 billion.
- Produce a positive cumulative net state revenue impact of \$743 million.

For each year in which the company meets the required performance targets, the state will provide a grant equal to 75 percent of the state personal income withholding taxes derived from the creation of new jobs. Because Dell will locate in a Tier 4 or 5 county, nearly \$4.7 million will go to the state's Industrial Development Fund for infrastructure improvements in rural North Carolina.

Dell also will receive training assistance from the New and Expanding Industry Training program, Golden LEAF Foundation and the Piedmont Triad Workforce Development Boards. Funding provided by the workforce boards is contingent upon the company hiring displaced and adult workers. The estimated total cost of all the incentives is \$242.5 million over 20 years based on Dell's current plan.

For additional information about Dell Inc. and/or to apply for a job, visit the company's web site at www.dell.com.
